

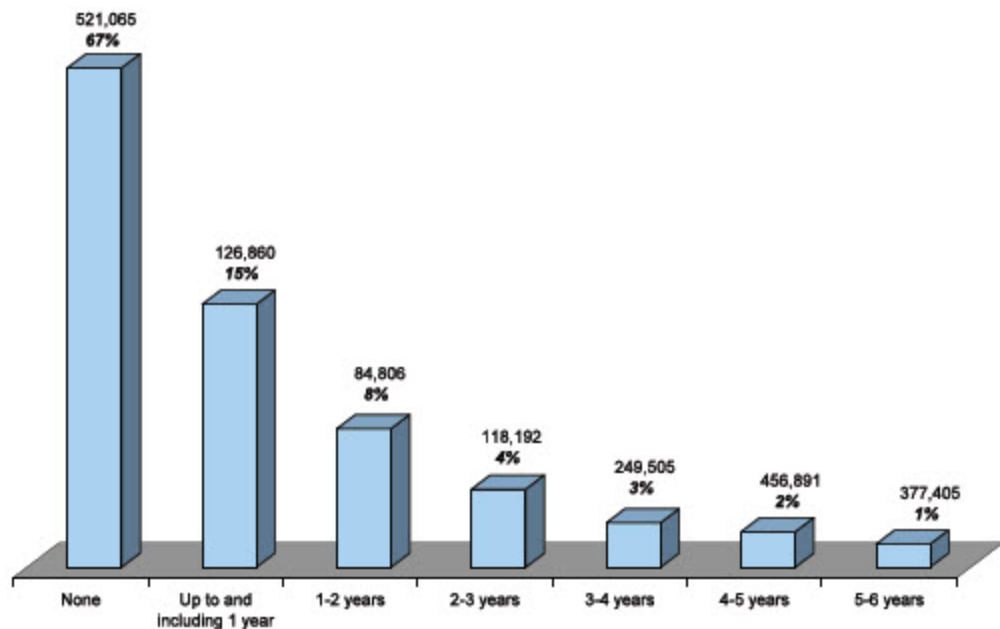

**Figure 5: Apprenticeship Training Required for non-College Jobs in the Stimulus Package\***

\*Non-college jobs include high school dropouts, high school graduates, post-secondary certificates and some college but no degree.

Apprenticeships presented in this chart are those with a registered US Department of Labor program that provide a certificate of completion. They represent approximately 25-50% of all Apprenticeship programs in the United States. (This number is a rough estimate provided by industry experts. Estimates of unregistered apprenticeship programs are difficult to obtain).
